Circuits: What Happened?

Draw a picture of the circuit your class created. Make sure to label all your materials (battery, wire, light bulb).

Have your teacher use a wire cutter to cut one of the wires.
Draw the circuit now. Make sure to label all your materials
(battery, wire, light bulb).

Cut on dotted lines and then fold on solid line. Under each flap, draw an example of how we use each object.

electricity

sun

batteries

Cut on dotted lines and then fold on solid line. Under each flap, draw an example of each kind of energy.

Sound

Light

Heat

Saving Energy

Some types of energy will not last forever. How can we make sure we are not wasting energy? Write your answer next to each picture.
