Name: _____

The typical adult will breathe close to 18 times in one minute. ABOUT how many breaths would an adult take in 7 minutes. Don't give an exact answer...round to the nearest ten.

Put your answer in a sentence!

If you get finished early, see if you can come up with other ways to solve the problem! (draw a picture, use counters, write a number sentence, use words...you get the idea 😊)

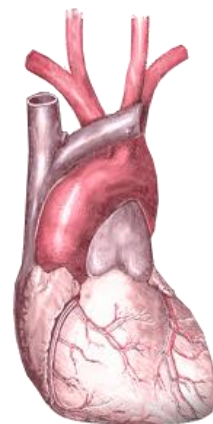

Name: _____

The typical adult heart might beat 4,231 times in an hour! A ten year old's heart can beat 5,879 times in an hour! ABOUT how many more times does a kid's heart beat than an adult's heart? Don't give an exact answer—round to the nearest thousand!

Put your answer in a sentence!

Show your work or explain how you got your answer using some of our math tools. Don't just write your answer to the problem!

Fun fact—your heart is about as big as your fist!

Name: _____

The small intestine in an adult is close to 23 feet long! If there were 5 teachers in the room, ABOUT how much small intestine would that be? Don't give an exact answer—round to the nearest ten.

Put your answer in a sentence!

If you get finished early, see if you can come up with other ways to solve the problem! (draw a picture, use counters, write a number sentence, use words...you get the idea 😊)
